Question: I forgot my Windows Vista password and now can't login to my Windows Vista anymore. How can I find my Windows Vista password?

Answer: Forgot your Windows Vista password? Do not fret- it may happen to each of us. For security, we're supposed to make a strong password that is difficult to detect by other peoples, but sometimes we are so roughly that we **forget vista password** and have no idea how to find it. Here I'll recommend your several ways to find your Vista password when you [forgot Windows Vista password](#) .

Option 1: Windows Vista Password Reset Disk

If you are smart have created a Windows Vista password reset disk at some point in the past, now is the time to use it to reset the **forgotten Windows Vista password!** If you have changed your Windows Vista password after creating it, the disk still work to reset your **forgotten vista password**. Follow the instructions below to reset Windows Vista password.

Step 1: Click “Reset Password” link below the login box. The Password Reset Wizard starts. The Password Reset Wizard allows you to create a new password for your user account. Then click Next.

Note: you have to insert your Vista password reset disk into your drive firstly, or you’ll get an error message:

Step 2: Pick the right disk if you have more than one.

Step 3: Type in a new password and a hint for the password. Click Next. To close the wizard, click Finish.

Option 2: Free Windows Password Recovery Tool

If you are looking for some free Windows password recovery tool to recover your **forgotten vista password**, Ophcrack, Offline NT Password & Registry Editor are your best choice. But there is a condition that you should master computer technical so well because of their complexity on operation. So if you are a compute green hand, I recommend you try another way or other Windows password recovery tools.

Options 3: Commercial Windows Password Recovery Program

If by far you haven’t found your **forgotten Vista password**, then it's time to get serious. Search on Google to find Forgotten Windows Vista Password recovery solution. When you are confused by so many commercial windows password recovery software, I recommend you use Windows Password Recovery 6.0. With it, you can get instant access to your forgotten Windows vista system by burning a bootable CD/DVD or USB flash drive. The biggest advantage of Windows Password Recovery 6.0 is its 100% recovery rate and its easy-to-user feature, even a computer novice can easily reset **forgotten Windows Vista password** within 5 minutes through this guides:

Step 1: Download **Windows Password Recovery 6.0** and install it.

Step 2: Burn Windows Password Recovery 6.0 to CD/DVD or USB flash drive.

Step 3: Boot the locked PC form CD/DVD or USB.

Step 4: Reset Forgotten Windows Vista password to be blank.

BTW, Except **Forgetting Windows Vista password**, even if you forget Windows 7/Vista/XP/2000 and Windows Server 2008/2003 password, you can also reset the forgotten password by Windows Password Recovery 6.0.

Option 4: Still Can't Find Your Windows Vista Password

If you still can't find your [forgotten Windows Vista password](#), you will need to do a "clean install" of Windows Vista. This is a destructive step but if you forgot your Vista password and can't find the password in any other way, a clean install is guaranteed to help you get access to your PC again.
